

Sales & Applications Physicist

Catalytic Instruments is a cutting-edge aerosol company, small in size but big in innovation. Our products are distributed worldwide and play a crucial role in regulatory approval processes for combustion engines, aircraft turbines, and environmental agencies.

 **We're hiring! If you fit the profile below, we want to hear from you!**

What You Bring:

- A BSc or MSc in a STEM field with a focus on applied science
- Proficiency in computational tools (MS Office)
- A pro-active & flexible personality, with a hands-on problem-solving approach
- Excellent attention to detail and meticulous record-keeping
- Interest in engineering and understanding of core principles
- Strong to excellent communication skills in English (both written and spoken), German (conversational).
- Prior experience with aerosol equipment or methods is a plus, but not required
- Friendly, humorous approach to life and work

Your Role:

- Networking with universities, automotive suppliers, and environmental agencies
- Active participation in scientific congresses, workshops, and trade shows
- Communicating with customers and regulatory bodies, clarifying technical requirements
- Supporting marketing activities
- Assisting in the development, coordination, and monitoring of new product designs
- Performing and evaluating aerosol measurements for performance tests

What We Offer:

- Flexible work environment & tasks full of variety
- Good work-life balance is important to us
- Creative, passionate, and unique work culture
- Opportunities to take on responsibility and advance your career

If you are passionate about innovation and eager to make an impact in a global company, **send us your CV!**
